EXPLANATION For the Easier Finding the Distance of Places in this Map I have Squared it with Parallel Lines of Latitude which shews the Bredth of the County from South to North and by Inspection, what Latitude any Town in the County lyeth in. Those Lines are Intersected by Meridians about three Miles Distane, beginning at Yarmouth, the most Eastern Point of this County (and within half a Mile of all England) There I begin my Longitude and Count towards the West to Wisbech which I find 60 Miles by the Former Map is but 48 Miles, which is 14 Miles Difference The most Southern Latitude I find to begin in 52 D. 48 M. And 53 D. 9 M. is the most Northern Latitude which is the Bredth of the County, and is 41 Miles the former Map is 29 Miles from North to South. the Difference is 12 Miles, As to the Parishes being Misplac'd and many omitted in the Former Maps I leave the Inspector to find Out in this, Hopeing they will find in 3 minuts what I have been in Search of, this three Years.

The WEST Prospect of the Town of GREAT YARMOUTH; likewise, the DENES, and ROADS.
This Town is near a Mile from the South Gates, to the North Gates. Survey'd p.r I. Corbridge.

The NORTH EAST Prospect of NORWICH

NORFOLK is an Island Inclining to an Ovall form, Clos'd on the South, with the Rivers Waveny and the lesser Ouse, which Divides it from Suffolk. On the East & North with the German Ocean; On the West towards Cambridge Shire, with Some branches of y.e great Ouse; towards Lincoln Shire with that part of y.e Nene which passeth from Wisbich into the Washes. The Name Arriseth from y.e Situation of y.e People, who being y.e Northermost of y.e Kingdom of y.e East Angles, Are therefore call'd the Northfolk, as y.e Southermost Suffolk; The Coast is Fortunate in Fish, & hath many good Harbours, where of Lynn & Yarmouth are y.e mother Ports, & of great Traffique, Wells, Blackney, & Cley are next in Estimation; y.e whole County abounddeth with Rivers & Pleasant Springs, of which y.e Ouse is y.e Chiefest; y.e next is Hierus or Yere, Passing from Norwich to Yarmouth, where it Recieveth y.e Bure Coming from Alsham both of them are of great Service for Water Carriage, but very Remarkable for their plenty of Fish. The Waveny & the lesser Ouse are Also Navigable & of great Use; Upon the entery of the Saxons, this County with Suffolk fell in the portion of y.e Angles, About y.e Year 561 were together erected into a Kingdom by Uffa but haveing Suffer'd many Tempests of Fortune, it was in y.e Year 870. utterly Wasted & Extinct by Hinger & Hubba y.e Dane who overthren y.e Vertuous King Edmond about Thetford & after Martured him at S.t Edmunds Bury, yet they did not long Enjoy it for King Edward Shortly Recover'd it and Annex'd it to his other Kingdoms.
