

An ACCURATE MAP of GREAT BRITAIN, FRANCE & IRELAND, with Part of SPAIN, GERMANY, DENMARK &c.
 Shewing at One View the True Bearing and Horizontal Distance, of any Place within 700 Miles of LONDON: Drawn from the Best Authorities.

Advertisement
 As Mile Stems are placed on most of the Principal Roads in England, the distance of any City or Principal Town may be easily known. Therefore the chief design of this Map is to ascertain as near as possible the Distance of any Foreign City or Port from London, which can be effected by no other Method than Horizontal Measure, &c. as the Author has taken considerable pains in Drawing this Map, & the Plates &c. himself, to well be found upon Inspection, to be more correct than any thing of the kind Extant.

The Ovals are Drawn at the Distance of 20 Miles from each other.

Degrees of Longitude East and West from London
