A l'Ecole municipale de Tissage et de Broderie de Lyon

1908

Il est à la portée de tous les techniciens d'établir un certain nombre d'*armures fantaisies*, soit en les dérivant des armures fondamentales et classiques ou des armures fantaisies déjà en usage, soit en groupant des points sans ordre ni méthode, soit encore par différents systèmes de superposition d'armures.

Mais de ces armures ainsi obtenues, combien rendront sur le tissu, l'effet qu'elles semblaient promettre sur le papier ? Combien pourront être utilisées ? Ceux qui ont tenté de le faire savent combien on éprouve de désillusions en constatant les résultats donnés par le tissage d'armures, dont les arrangements de fils semblaient parfaits sur la mise en carte.

Pour éviter des tâtonnements et des essais décourageants, M. Moiret a entrepris ce recueil. Sous une modeste apparence, cette œuvre a le mérite d'être la meilleure collection d'armures fantaisies réunie jusqu'à ce jour. Il n'eût pas été difficile d'en augmenter le nombre, mais l'auteur n'a voulu conserver que les armures présentant un réel intérêt, laissant de côté les armures classiques et les armures fantaisies défectueuses.

Ce qui donne une valeur inappréciable à cette collection d'armures c'est que toutes ont été établies dans un but pratique, toutes ont été calculées pour être utilisées sans retouche.

Les auteurs qui ont publié des recueils analogues avaient presque toujours négligé la question de l'*embuvage*, considérée trop souvent comme secondaire ou sans importance. M. Moiret, au contraire, a toujours eu le souci du rôle que devaient remplir ces armures et ainsi d'éviter l'emploi de plusieurs rouleaux de chaîne, en donnant à tous les fils des mouvements équivalents.

Dans ces conditions il est à peine besoin d'indiquer tout le profit que l'on peut tirer de cette collection pour la création de nouveaux tissus.

L'œuvre de M. Moiret présente, en outre, comme création nouvelle de la plus grande valeur, un groupement de près de 300 armures de gaze anglaise.

Un spécialiste expérimenté, un homme du métier, pouvait seul grouper ces armures, presque toutes éprouvées pratiquement, et qui sont d'autant plus difficile à établir que le mouvement de leurs fils ne peut être compris à première vue que par ceux qui ont l'habitude de leur emploi.

Cette collection s'imposait donc, elle vient à point et les techniciens y trouveront des ressources sans limites. Ces armures pourront être utilisées telles qu'elles, en les retournant, en doublant certains fils, en en plaçant de grosseurs différentes; elles serviront aussi à en construire de nouvelles.

En modifiant les comptes de chaîne et de trame, il sera possible d'obtenir pour chaque contexture des tissus différant d'aspect; telle armure médiocre avec une certaine entente de matières, sera parfaite en employant des fils soit plus gros, soit

plus fins ou en changeant simplement la proportion des fils de la chaîne et de la trame.

Ce recueil doit donc être dans les mains de tous ceux dont la profession se rattache à la partie technique de la fabrication des tissus. Il servira non seulement à la composition des tissus soieries, pour lesquels ces armures ont été spécialement étudiés, mais aussi au tissage des étoffes de laine et de coton où les combinaisons d'armures offrent des ressources également variées et profitables.

Félix GUICHERD,

*Directeur de l'Ecole municipale de tissage et de broderie de Lyon.*

# ARMURES GAZE ANGLAISE

Dans les armures qui suivent, les fils travaillant par les **corps de fond** (corps droit et corps de correspondance) sont peints en noir ; les fils travaillant par le **corps anglais** sont pointillés noir.

Les fils de tour d'une même dent travaillent ensemble par le corps anglais ; ils ne sont armurés que lorsqu'ils sont commandés par le corps de correspondance, à leur place respective donné par l'ordre de remettage.

## REPRODUCTION GRAPHIQUE D'UNE ARMURE GAZE

### PEINTE SUR PAPIER MISE EN CARTE

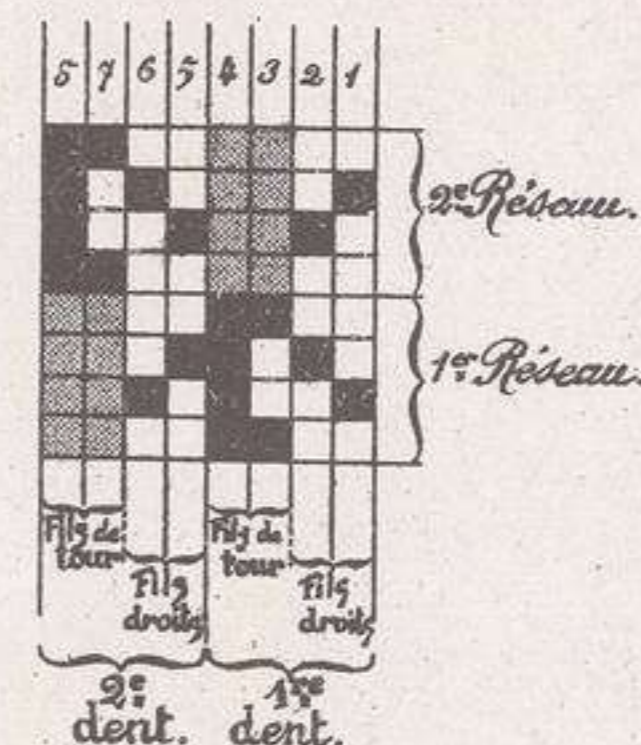

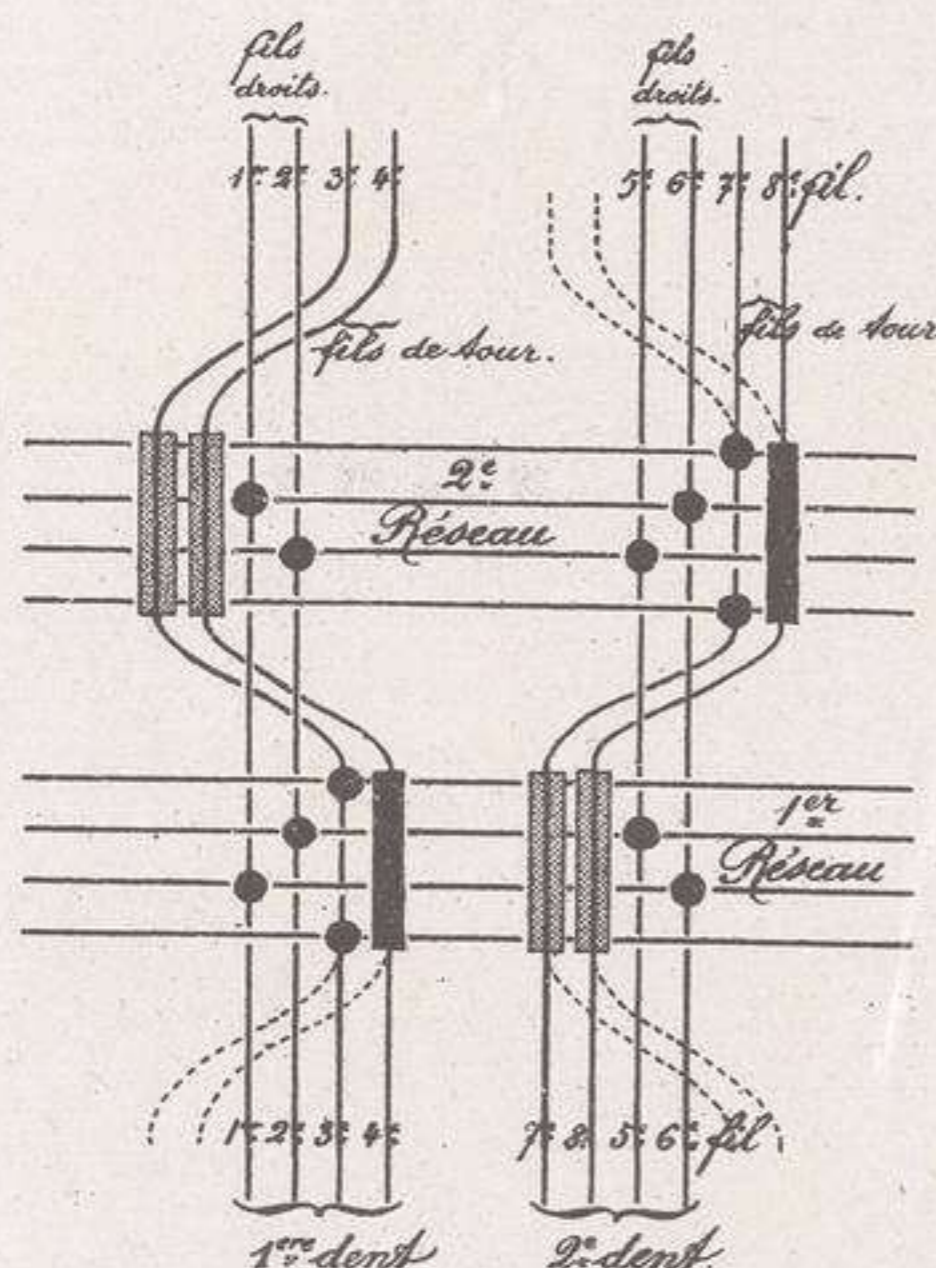

Il est facile de représenter le mouvement des fils d'une armure gaze peinte sur la carte : les cordes de carte ayant dans la hauteur de l'armure des parties pointillées sont des fils de tour, tandis que les cordes n'ayant aucun pointillé sont des fils droits.

Ainsi dans la mise en carte ci-dessous, les deux premiers fils (nos 1 et 2) ainsi que les 5<sup>e</sup> et 6<sup>e</sup> sont des fils droits, pendant que les 3<sup>e</sup>, 4<sup>e</sup>, 7<sup>e</sup> et 8<sup>e</sup> sont des fils de tour. De même sur les quatre premiers coups, formant le 1<sup>er</sup> réseau, les deux premiers fils de tour (fils nos 3 et 4) travaillent par le corps de correspondance ; ils travaillent par le corps anglais sur les quatre coups suivants formant le 2<sup>me</sup> réseau. Les fils de tour nos 7 et 8 font le jeu inverse.

Cette armure est donc une gaze de 4 fils et de quatre coups à regard et le tracé graphique ci-joint indique le mouvement des fils au rapport de l'armure.

Dans ces deux figures, les fils sont numérotés dans l'ordre du remettage :

- de gauche à droite dans le tracé graphique ;
- de droite à gauche dans la mise en carte.
