This image shows a blank, aged, cream-colored page. The paper has a textured appearance with some minor scanning artifacts, such as small dark specks and slight variations in tone.

This image shows a long, narrow strip of aged, light brown paper. The surface has a mottled texture with various shades of tan and beige. There are some very faint, dark, illegible markings scattered across the strip, which appear to be bleed-through from the reverse side of the paper. The overall appearance is that of old, unused material.
